

The image displays four mechanical linkages of the KY-V02 model, arranged vertically against a black background. From left to right, the linkages are colored yellow, white, black, and red. Each linkage consists of a top rectangular head, a central shaft with four joints, and a bottom rectangular base with a central handle-like protrusion. The yellow and white linkages have a smooth finish, while the black and red ones have a more textured, possibly metallic or high-gloss plastic appearance. The text 'KY-V02' is printed in red in the center of the image.
